Lesson Twelve
Saving and Investing
Saving and investing are cornerstones of financial management. To be effective money managers, students need to: establish and maintain a budget; set clear, specific financial goals; and understand all of their investment options.

saving and investing lesson outline

overview

Saving just 35 cents a day will result in more than $125 in a year. Small amounts saved and invested can easily grow into larger sums. However, a person must start to save.

This lesson provides students with a basic knowledge of saving and investing. The process starts with setting financial goals. Next, a commitment to saving is discussed.

Various savings plans are available to consumers. These include regular savings accounts, money market accounts, and certificates of deposit (CD). Then, students will analyze factors to consider when selecting a savings account. These include interest rates, fees, balance requirements, and deposit insurance.

Investing takes saving one step further in a person’s financial plan. Bonds, stocks, mutual funds, real estate, and retirement accounts are covered in the next section of this lesson.

Finally, students are made aware of potential investment frauds. The variety of these swindles increases each year as con artists look for new opportunities to separate people from their money.

goals

Introduce the advantages and disadvantages of common savings and investment vehicles, and show the short- and long-term effects of various savings and investment choices.

lesson objectives

■ List and prioritize some of your short- and long-term budget goals
■ List and explain some of the advantages of saving money
■ Understand the concept of “pay yourself first” and list some ways to encourage this habit
■ List and explain the differences among the most common saving methods
■ Understand the advantages and disadvantages of popular investment vehicles
■ Understand what investment fraud is, and list some of the ways you can protect yourself against investment swindlers
■ Compare and contrast the short- and long-term consequences of investment decisions

student activities
12-1  Setting and Prioritizing Your Financial Goals
   ■  Have students complete the “Setting Financial Goals” worksheet. If your students
don’t have enough income to complete this exercise, give them a theoretical income to
work with.
   ■  Ask students to share some of their goals with the class, including estimated cost,
target date, and the amount they would need to save each week to meet their goal.
   ■  Discuss and reemphasize the importance of goal setting and planning.
   ■  Have students prioritize the goals they identified.
12-2  Calculating Interest
   ■  Have students complete the “Calculating Interest” worksheet.
   ■  Review the answers and, as needed, show the calculations on the board.
   ■  Reemphasize how the interest rate and the method of calculation can affect how much
their money grows.
   ■  Have students visit practicalmoneyskills.com/calculators for online help.
12-3  Selecting Mutual Funds
   ■  Review types of mutual funds.
   ■  Have students complete this exercise.
   ■  Ask students to explain their answers.
12-4  Test Your Knowledge of Saving and Investing
   ■  Have students complete this exercise.
   ■  Discuss their answers.

### Set Financial Goals

1. **Why save?**
   - To reach financial goals
   - In case of an emergency
   - To have the option of taking advantage of unforeseen opportunities

2. **Why set goals?**
   - Give direction for making plans and taking actions

3. **Set and prioritize your financial goals**
   - The goal-setting process
   - Short-term goals (1–4 weeks)
   - Medium-term goals (2–12 months)
   - Long-range goals (1 year or longer)

### Pay Yourself First

1. **Why?**
   - To make a habit of saving money to reach your financial goals

2. **What it takes**
   - Commitment
   - Discipline
   - Delayed gratification

3. **Ways to do it**
   - From each paycheck or allowance, deposit a set amount or percentage into your savings account before spending money on anything else.
   - At the end of the day, put all your change in a “savings” container. Once a month, deposit the money in a savings account.
   - Whenever you get unexpected money, put a portion of it into savings.

4. **Remember**
   - Amount saved isn't as important as getting into the habit.
## savings accounts

1. **Advantage**
   - Simplest way to earn interest while keeping money readily accessible
2. **Passbook and statement accounts**

## other saving methods

1. **Money-market deposit account**
2. **Certificates of deposit**

## how to calculate interest

1. **Simple**
2. **Compound**
3. **Exercise**

## choosing a savings account

1. **Factors to consider**
   - Interest rate
   - Fees, charges, and penalties
   - Balance requirement
   - Balance calculation method
2. **Truth in savings law**
saving and investing teaching notes

shopping for a savings account
1. Optional class activity
2. Class presentations of their findings and choices

about the rule of 72
1. What it is
   - A simple way to estimate how money can grow
   - Divide 72 by the interest rate to find how many years you need for your money to double.
   - Divide 72 by a number of years to determine the interest rate needed to double your money in that period of time.

saving vs. investing
1. Difference
   - Degree of risk
   - Rate and stability of return
   - Availability of funds for use
   - Amount of protection against inflation

field activity:
Have students compare savings rates at various financial institutions. Also see: bankrate.com

discussion
slide 12-H

discussion

web activity:
Have students obtain information from sites such as: fool.com finance.yahoo.com
some common investment vehicles
For each, discuss what it is, how it works, and what its advantages are
1. Bonds
2. Mutual funds
3. Stocks
4. Real estate
5. Retirement plans
   ■ IRAs—an example of return on investment

comparing savings and investment vehicles
1. Review
   ■ Savings accounts
   ■ Bonds
   ■ Mutual funds
   ■ Stocks

capital gains and losses
1. What they are
   ■ The profit or loss made on an investment
test your knowledge of saving and investing
1. Complete the exercise
2. Discuss the answers

about investment fraud and investment swindlers
1. What they are
2. How they work
3. Techniques they use
4. What you can do to protect yourself

Have students present in class or on video various investment situations. Discuss if these are legitimate or fraudulent investment opportunities.

Have students obtain investment fraud information at:
ftc.gov
fraud.org
nasaa.org

lesson twelve quiz

quiz 12-5
directions
Write the answers to the following questions in the blanks provided. Use the space below each problem to show how you arrived at your answers.

1. If you put $200 in a savings account that paid 5.5% simple interest each year, how much interest would you earn in five years?
   $55
   $200 \times 0.055 = $11
   $11 \times 5 = $55

2. If you put $150 in a savings account that paid 6% compounded yearly, how much interest would you earn in five years?
   $50.73
   $150 \times 1.06 = $159 \text{ (after 1 year)}
   $159 \times 1.06 = $168.54 \text{ (after 2 years)}
   $168.54 \times 1.06 = $178.65 \text{ (after 3 years)}
   $178.65 \times 1.06 = $189.37 \text{ (after 4 years)}
   $189.37 \times 1.06 = $200.73 \text{ (after 5 years)}

3. If you put $25 each month into a savings account that paid a simple interest rate of 6.5% each year, how much would you have in your account at the end of two years?
   $639.00

\begin{array}{|c|c|c|c|c|}

4. If you put $10 each week into a savings account that paid 6% interest compounded yearly, how much money would you have in your account after three years? (Hint: Use How Much Will My Savings Grow Calculator?)

$1,754.80
selecting mutual funds

answer key

directions
For each of the investment situations below, select the type of mutual fund that would be most appropriate from this list:

Balanced Fund    Income Fund
Global Bond Fund  Industry Fund
Global Stock Fund  Municipal Bond Fund
Growth Fund       Regional Stock Fund

1. A person wants an international mutual fund without the risks associated with stocks.
   Global Bond Fund

2. An investor wants tax-exempt income from investments.
   Municipal Bond Fund

3. An investor is interested in investing in health-care stocks.
   Industry Fund

4. A person wants to invest in stocks from around the world.
   Global Stock Fund

5. A person is interested in long-term growth for future financial security.
   Growth Fund

6. An investor seeks to buy stock in companies located in Europe.
   Regional Stock Fund

7. A retired person desires investment earnings to provide for current living expenses.
   Income Fund

8. A person wants to invest in a blend of stocks and bonds.
   Balanced Fund

9. An investor wants to invest in debt instruments issued by state and local governments.
   Municipal Bond Fund

10. A person expects growth of companies in Latin America.
    Regional Stock Fund
test your knowledge of saving and investing *answer key*

directions
Write the answers to the following questions in the blanks provided. Use the space below each problem to show how you arrived at your answers.

1. How long would it take to double your money in an account that paid 6% per year?
   \[ \frac{72}{6} = 12 \text{ years} \]

2. What interest rate would double your money in 5 years?
   \[ \frac{72}{5} = 14.4\% \]

In the space provided, write the letter of the savings account or savings method the statement represents.

- a) Passbook account
- b) Statement account
- c) Interest-earning checking
- d) Time deposit (Certificate of Deposit)
- e) Money-market deposit account

3. **e** A combination of a checking and savings account. Interest rates, which are based on a complex structure, vary with the size of your balance.

4. **c** Combines the benefits of a checking and savings account. Interest is paid each month on unused money in the account.

5. **e** You can only write a limited number of checks each month.

6. **d** Bank pays a fixed amount of interest, on a fixed amount of money, for a fixed amount of time.

7. **d** Penalty is usually charged if money is withdrawn before expiration date.

8. **c** Interest rate is usually lower than passbook or statement accounts.
In the space provided, write the letter of the investment vehicle the statement represents.

a) Bonds  

b) Mutual funds  

c) Stocks  

d) Real estate  

e) Keogh plan

9. __d__ This type of investment offers an excellent protection against inflation.

10. __e__ A retirement plan for the self-employed.

11. __a__ Issuer agrees to pay investors a fixed interest rate for a fixed period of time.

12. __e__ You can contribute each year to this tax-deferred account.

13. __e__ Penalty is usually charged if money is withdrawn before expiration date.

14. __b__ Professionally managed portfolios made up of stocks, bonds, and other investments.

15. List the four most important factors to consider when shopping for a savings account

   Interest rates  
   Balance requirement  
   Fees, charges, penalties  
   Balance calculation method

16. List the four main differences between saving and investing.

   Degree of risk  
   Availability of funds for use  
   Rate and stability of return  
   Amount of protection against inflation
lesson twelve quiz: saving and investing

answer key

true-false
1.   A certificate of deposit must be held for a set amount of time such as six months or a year.
2.   Compound interest refers to money earned from buying a tax-exempt investment.
3.   A share of stock represents ownership in a company.
4.   A mutual fund is an investment issued by a state or local government agency.
5.   Treasury bonds are a safer investment than real estate.

multiple choice
6.   The lowest interest rate is usually earned on a:
   A. money-market account
   B. passbook account
   C. certificate of deposit
   D. mutual fund
   
   A. 6
   B. 8
   C. 9
   D. 12

7.   The total interest earned on $100 for two years at 10 percent (compounded annually) would be:
   A. $2
   B. $21
   C. $11
   D. $10
   
9.   An example of a company’s debt is a:
   A. corporate bond
   B. share of stock
   C. mutual fund
   D. municipal bond

10.  The investment with the most risk would be:
    A. a savings account
    B. U.S. Treasury bonds
    C. corporate stocks
    D. corporate bonds

case application
The Johnson family includes Marv (age 34), Gail (33), Andrew (8), and Molly (4). What are some investment goals that might be appropriate for this family? What types of investments might be used to achieve these goals? Common investment goals in this situation might be to create an emergency fund, to save for the children’s college education, and to save for retirement. The Johnsons might start their saving-investing program with a savings account, money market account, or certificates of deposit. Next, they might consider an aggressive stock mutual fund that could give them good long-term growth for the education and retirement funds. All of these are easier to implement with an automatic withdrawal each month from a bank account to the savings account or the investment company.
